

SEPTEMBER 2026

EBENEZER RAPALE

# NEWS

In the second week of September we attended Sunday School at the Comunidade Alegre church in Namitatare, with Ebenezer apprentices fully involved. The church was divided into 3 groups, with the task of turning Psalm 33:11 into a song. The song was led by one of our first year apprentices, Victor Serrote. It is always a joy to see apprentices open to sharing their skills with the community they are part of.

On 5 September we celebrated a great event with the same church community, the marriage of Ebenezer graduate Juma to Guida, a native of Ribaué. Juma is one of the elders in the Comunidade Alegre and so the event was attended by many of the community, along with family, friends, fellow graduates, and apprentices from Ebenezer (who provided most of the singing throughout the day). It was a memorable and joyful occasion.

Team member Renaldo traveled to Murrupula to visit 2024 graduate, Edvaldo Tomás. From being a shop employee, Edvaldo has been promoted to manager and he is grateful for a job that can support his family. Renaldo had the privilege of talking to Edvaldo's wife who described him as a man who protects, cares and fears God. What a blessing to see the growth in Edvaldo, a man living in dependence on God.

# INTRODUCING

Recently, 2nd year apprentice Abreu Lima Júnior has been a source of inspiration in our community. As a first year, he seemed to struggle with farm work. But now he surprises his colleagues with his ability and strength! Abreu enjoys classes and gatherings and is now leading the cleaning groups in the men's dormitories, where his reliability and good example have others looking up to him. Even better, Abreu understands that his daily life at Ebenezer is guided by God and he pursues a healthy relationship with God.

# PRODUCTION

-----

We completed our tomato harvest this month, unfortunately in the midst of some major pest challenges. This meant our harvest of 8,808 kg was below our target of 10,000 - 15,000 kg.

-----

-----

We have transplanted more tomatoes smoothly, although we are now facing pest problems with these plants.

-----

-----

We also planted ½ ha of maize this month. We are noticing some weak soil in our fields which we are working to improve.

-----

-----

Our layer division has been producing an average of 1,700 eggs per day. This is very encouraging for the team who are now leading the way in terms of results across our productive areas.

-----

-----

Our broiler production continues according to plan, with each cycle averaging sales of 280 birds. A total of 3 cycles were completed in September.

-----

-----

A real success in our production this month has been consistency and commitment in following the production calendar across all our areas.
